

The group workshop software uses a single page layout that follows a flexible pattern of activities shared via an e-meeting application

The screenshot displays the ActionMap software interface. At the top, there is a navigation bar with a menu icon, a help icon, and the text "Add / Edit / Comment On All Map Parts". To the right of the navigation bar are buttons for "Activity Help", "Quick Info", "Activity Menu", and "Go to Next Activity", along with a refresh icon and the "ActionMap Toolkit" logo.

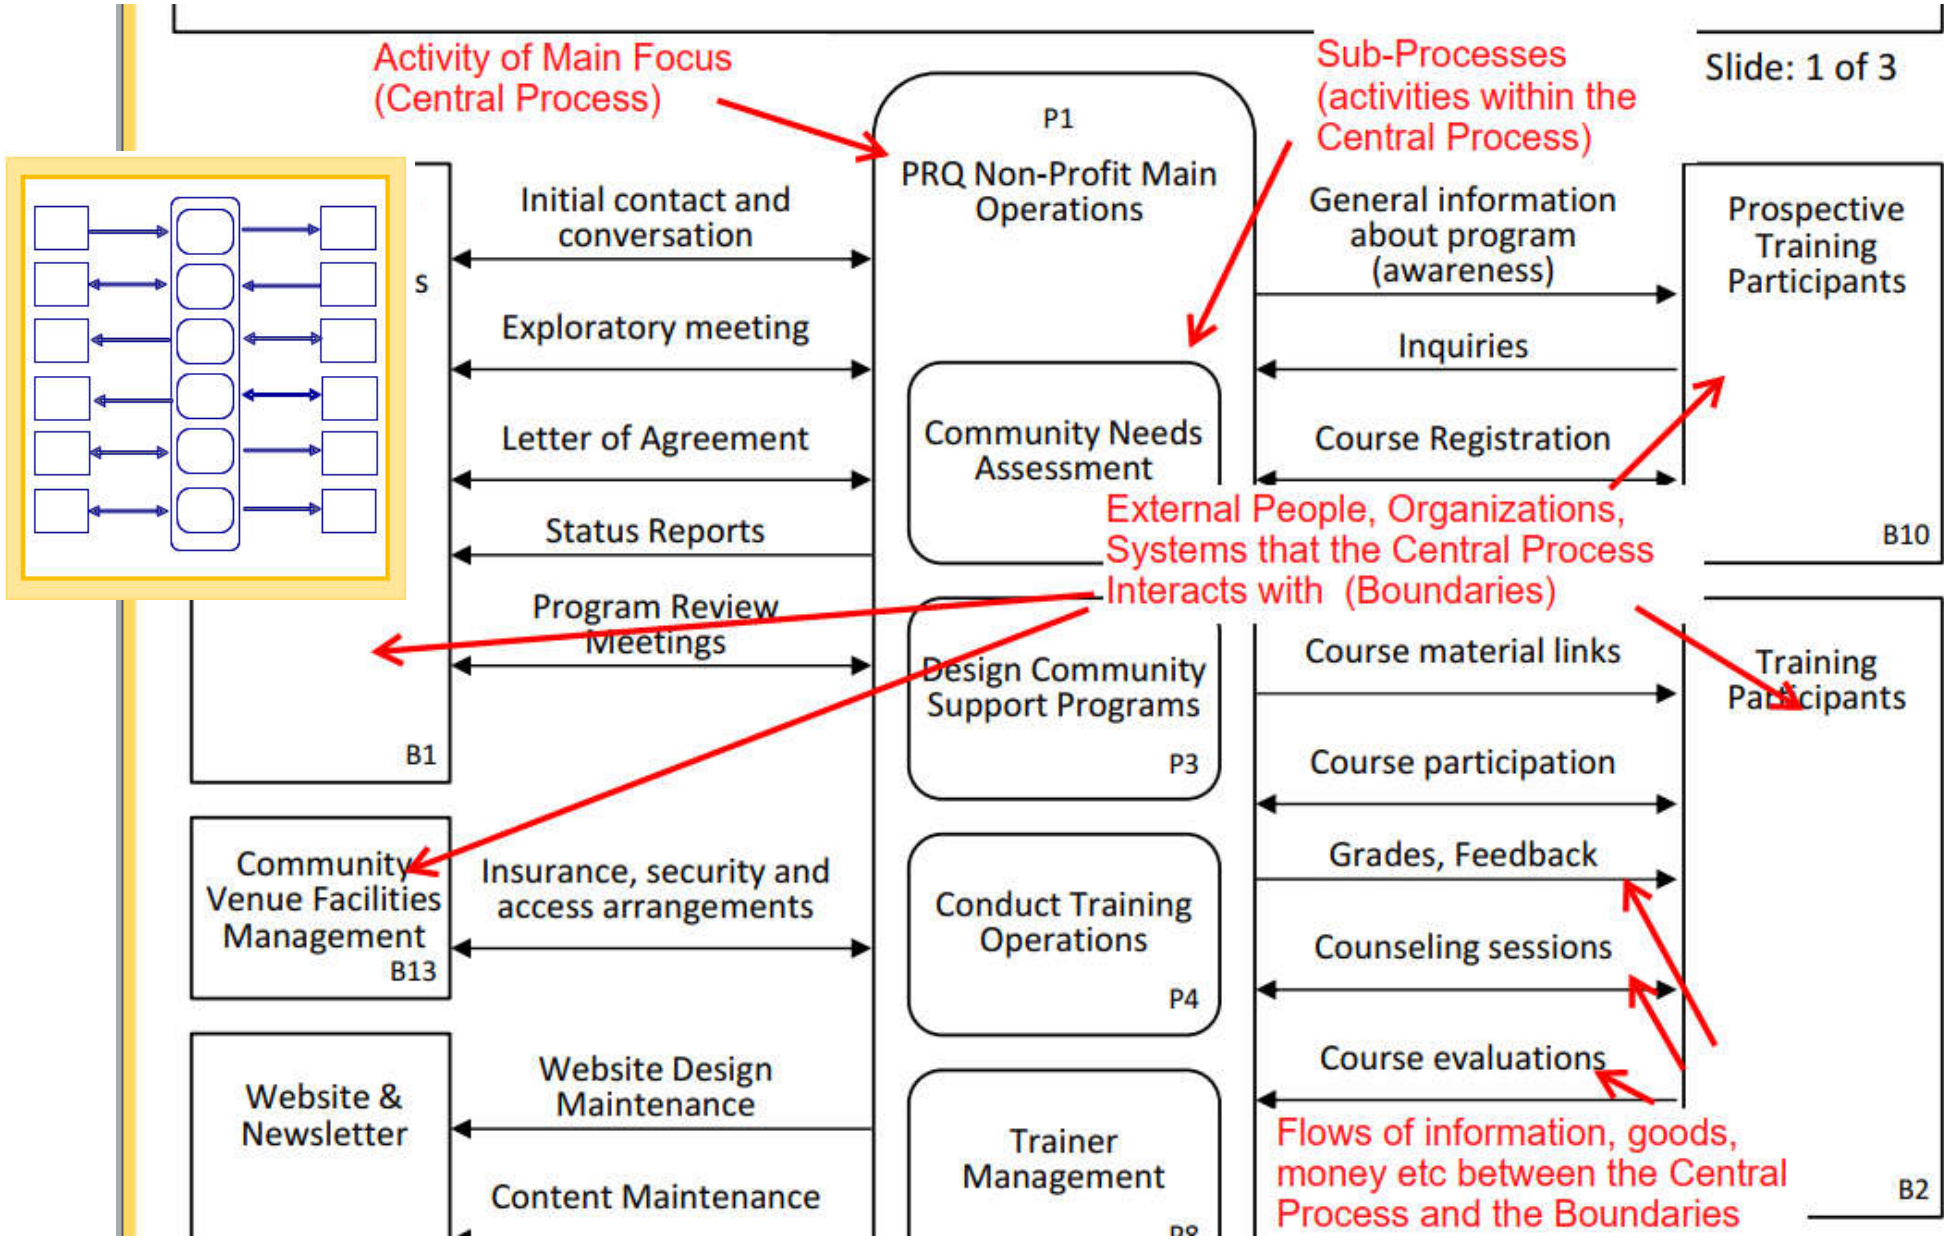

The main interface is divided into three sections:

- Map:** On the left, there is a map area with various boxes and arrows. The boxes represent different components like "Community Sponsoring Organizations", "Community Venue Facilities Management", and "Website & Newsletter". Arrows indicate interactions between these components and other parts of the system.
- List:** On the right, there is a list area with a search bar and a list of items. The list includes "Area Name PRQ Non-Profit", "Central Process PRQ Non-Profit Main Operations", and several "Major Goal" entries such as "Expand to new geographies" and "Add training courses in new subject areas".
- ActionMap Main Cycle:** In the center, there is a large yellow-bordered diagram titled "ActionMap Main Cycle". It is divided into three main sections:
 - Start Session:** A single box at the top.
 - Mapping Activities:** A section containing a flowchart with three boxes: "Map", "Evaluate", and "Prioritize". "Map" and "Evaluate" are connected by a curved arrow pointing from Map to Evaluate. "Evaluate" and "Prioritize" are connected by a straight arrow pointing from Evaluate to Prioritize. There is also a curved arrow pointing from Evaluate back to Map.
 - Planning Activities:** A section at the bottom containing a linear flowchart with three boxes: "Capture Proposed Changes", "Create Action Plan", and "Assign and Schedule". These are connected by straight arrows pointing from left to right.

The mapping provides structure and focus while the evaluating provides energy and engagement, working together to rapidly create strong shared understanding of tasks, value and ideas

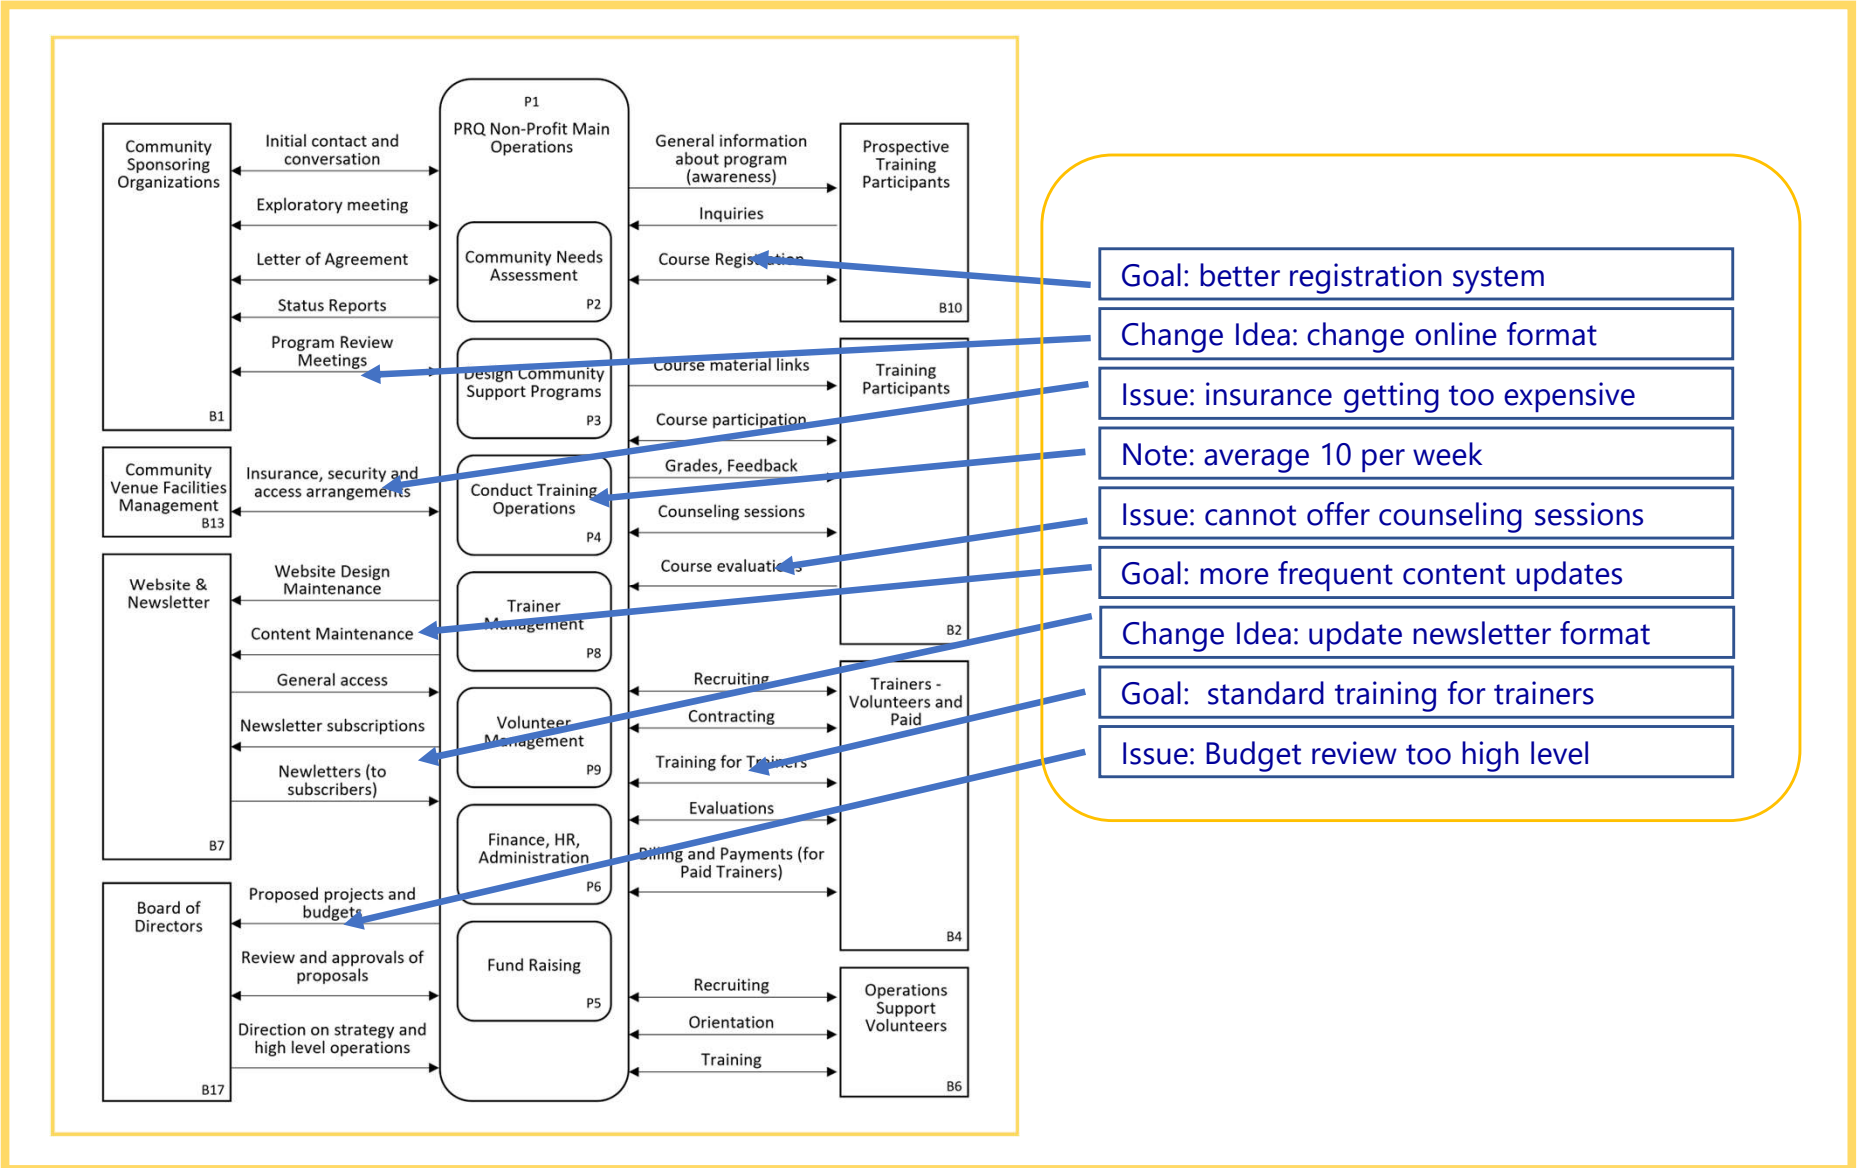

All maps use a standard, fast-to-create and easy-to-follow layout

Evaluations and Notes are associated with specific map parts

This helps to maintain focus and concreteness
